EDUCATION

St. Bonaventure University, St. Bonaventure, NY **May 2026**

Bachelor of Science, Major in Computer Science, Minor in Cybersecurity

GPA: 3.86 / 4.0

RELEVANT EXPERIENCE

Duct Divers MI LLC – Web Developer & Systems Engineer Intern **June 2026 – Present**

- Architected and shipped a production Next.js/PostgreSQL platform (Supabase) unifying a public booking site, mobile sales-rep portal, and admin panel under one shared database, eliminating a double-booking bug from two disconnected legacy systems.
- Engineered a race-condition-safe booking flow using Postgres advisory locks, validated by a dedicated concurrency test.
- Implemented defense-in-depth security (server-verified sessions, Row Level Security, and Cloudflare Turnstile) to close a bot-driven rate-limit bypass, backed by a 401/403 security audit suite.
- Built and maintained a 339-test suite (Vitest + Playwright) covering booking logic, role-based access control, and WCAG 2.1 AA accessibility.

St. Bonaventure University – Tutor **September 2024 – May 2026**

- Tutor undergraduate students in foundational computer science concepts, including computational thinking and Object-Oriented Programming.
- Provide one-on-one tutoring for Algorithms & Data Structures, improving student comprehension and problem-solving skills.

no-pact – Video Game Developer Intern **June – August 2024**

- Architected a shared movement system in C# for both the player and AI-controlled zombie horde using a common IMoveable interface and Rigidbody physics, with horde behavior dynamically switching between input-following and pursuit states as the group scaled past 350+ units.
- Optimized performance from 30 to 60 FPS using object pooling and non-allocating functions; collaborated weekly with a senior programmer through code review to debug complex systems and refine gameplay balance.

PROJECTS

Street Memory and Visualization System **September 2025 – May 2026**

Capstone Research | HCI | Graph Theory

- Conducted HCI research and developed a graph theoretic framework for visualizing pedestrian exploration history, leveraging route-tracking concepts to encourage navigation diversity and long-term user engagement.

Typing Time Across Devices and Age Groups **September 2025 – December 2025**

JavaScript | Machine Learning

- Built a web-based experimental platform to collect keystroke timing data for laptop vs. smartphone typing.
- Extracted behavioral features including total completion time, mean and p95 inter-key intervals, pause counts, and backspace counts.
- Conducted a two-factor (Age × Device) statistical analysis, identifying significant effects of age (p=.0089) and device (p=.00089), with a near-significant interaction trend (p=.053).
- Trained exploratory ML classifiers (Logistic Regression, SVM, Random Forest) on aggregated features, achieving up to 75% accuracy for device prediction and 71% accuracy for age-group prediction.

Attendance Verification System **November 2024 – May 2025**

Python | JavaScript | HTML | CSS | Flask

- Designed and developed a mobile web interface to collect and transmit student data for attendance to campus events to a backend server.
- Led the team as rotating project manager, conducting weekly reviews, identifying bugs and missing features, and delegating tasks to ensure steady progress and alignment with project goals.

HONORS & CAMPUS INVOLVEMENT

Honors

- Men's Swimming Grant-In-Aid Scholarship recipient
- Dean's List Fall 2022 – Spring 2026

Video Game Design Club

- Founder and former president of the college's first-time Video Game Design Club.
- Deliver educational presentations on game development fundamentals, covering topics like game design, programming, and project planning.

TECHNICAL SKILLS

Programming Languages: Java, C#, Python, SQL, JavaScript, TypeScript, CSS, HTML

Software Engineering: Next.js, Tailwind CSS, RESTful API Design, PostgreSQL, Supabase, Authentication & RBAC, Automated Testing, Git, Database Design, Responsive Design

Game Development: Unity, Gameplay Programming, AI Development, Level Design, and Scripting
